

HUMAN ANATOMY AND CELL SCIENCE, PH.D.

Degree Requirements

Students are required to take a minimum of 12 credit hours of approved coursework at the 7000 level. All students are required to complete IMED 7410 Biomedical Trainee Skills. Students must then complete a thesis. All program requirements are detailed in the program's supplementary regulations (<https://umanitoba.ca/graduate-studies/administration/supplementary-regulations>).

Attendance at the departmental seminar program is mandatory for all graduate students.

For complete program requirements, consult the program's supplementary regulations (<https://umanitoba.ca/graduate-studies/administration/supplementary-regulations>).

Expected Time to Graduate: 4-5 years

- ² The thesis proposal should be completed within two years of entering the program.
- ³ Prior to submission of their thesis for examination, the student normally will be expected to have presented their research at scientific meetings; and, contributed to a manuscript that is submitted, in press, or published.

¹ The coursework required for an individual student will be specified in consultation with the student's faculty advisor, and will depend upon the student's background. Additional elective coursework at the 7000 level may be completed through other U of M departments/faculties, or include any of the following ANAT / IMED elective courses taught by HACS faculty:
