

HEALTH STUDIES, B.H.ST.

Degree Requirements

The Bachelor of Health Studies (B.H.St.) curriculum integrates social science concepts, such as sociology and economics, with science concepts, such as biology and metabolism. This integration supports the promotion of health by giving graduates an understanding of health services, the social determinants of health, and how these determinants influence the health of individuals, families, and communities. One of the following 3 Concentrations must be completed: Health Policy, Planning and Evaluation; Health Promotion and Education; or Family Health. A Concentration is 18 credit hours and the requirements can be found in the Concentrations Tab.

Students should consult the Academic Calendar to ensure that they have the appropriate pre- or co-requisites before they attempt to register in a course. A number of courses are cross-listed between departments/faculties. Students are strongly encouraged to seek the advice of an Academic Advisor in the Interdisciplinary Health Program in order to plan their program.

Concentrations

For the Bachelor of Health Studies (B.H.St.) Degree, students must select and complete one of the three concentrations listed below. A Concentration is 18 credit hours.

1. Health Policy, Planning and Evaluation or
2. Health Promotion and Education or
3. Family Health

Students should consult the Academic Calendar to ensure that they have the appropriate pre- or co-requisites before they attempt to register in a course. A number of courses are cross-listed between departments/faculties.

Health Policy, Planning and Evaluation Concentration

The **Health Policy, Planning, and Evaluation** concentration can provide foundational knowledge related to health policy development and related evaluation, as well as programming services. This concentration can be a potential route for those wishing to pursue related graduate studies in Community Health Sciences (although students in all three concentrations are eligible to pursue graduate studies), or for individuals seeking careers in areas such as Health Policy Analysis or Program Planning and Evaluation.

Health Promotion and Education Concentration

The **Health Promotion and Education** concentration would be a route through which students wishing to pursue a career as a home economics teacher could obtain their 'teachable subjects' in Human Ecology (Home Economics). Human Ecology consists of courses in HNSC (Human Nutritional Sciences), FMLY (Family Social Sciences) and/or HMEC (General Human Ecology) or their equivalents. Students are advised that additional training will be required and that consultation with academic advisors in the Faculty of Education is recommended. Aside from home economics education, this concentration would lay the foundation for a future career options as Community Health Educators or Health-related Organization/Foundation Fundraising, or Health and Safety Coordinators or a Professional Home Economist (P.H.Ec.)

¹ Students considering a career as a Home Economics teacher through the Faculty of Education after degree program should consult with an academic advisor in the Faculty of Education. Some courses may be required for completion of higher level courses in the 'teachable subject areas' in HNSC (Human Nutritional Sciences), FMLY (Family Social Sciences) and/or HMEC (General Human Ecology) or their equivalents and will require careful program planning.

Family Health Concentration Electives List

The **Family Health** concentration was created to ensure that those students interested in family social science would clearly see a place for themselves in the new academic structure. One of the features of the Family Health concentration will be the ability to take courses relevant to the existing Family Social Science options (Aging and Developmental Health; Child and Youth Developmental Health; Family Economic Health; Family Violence; Social Development) allowing the program to be flexible and meet individual student needs. This degree provides the educational background suitable for a future career as a Community Wellness Worker, Victim Services Worker, Youth Care Worker, Residential Care Manager.
